

--- DISTRICT - Shivpuri(M.P.) ---

Safety and Security:

The total area excavated will be fenced properly with single opening left for the workers engaged in closure plan work.

Disaster Management & Risk Assessment:

No high risk accidents are anticipated, as the project is an open cast semi mechanized type of quarrying operation in a fairly stable area and free from land subsidence, earthquake etc. no tailing dam is proposed and risks associated with it will not come into picture.

However, in case anything happens then the designated Quarry Manager will take care and manage the situation. A communication and transport facility will be provided by the lease owner at their disposal which will help in evacuating persons involved in any accidents.

Care and maintenance during temporary discontinuance:

During such time, the area will be fenced and temporary staff will be arranged for taking care and maintenance
