

### **11.7.9 Disaster Management and Risk Assessment:**

The quarry lease area is small and the proposed quarry operation will be also small in nature. No river or nallah is flowing direct vicinity to the lease area. No seismic activities, land slide or flood etc. recorded in this area during the last 5 decade, informed by the village officials. The quarry operation will not go to the much deep side so chances of land slide, subsidence etc are completely nil.

### **11.7.10 Care and Maintenance during the temporary discontinuance:**

Mainly the mine will be temporarily discontinue during the rainy season and then during the time of local festival etc. The applicant already appointed one watchman for security.

### **11.8. Economic Repercussion of closure of mine and manpower retrenchment:**

As per the rule 42, (C) MPMMR 1996, mine submitting the progressive mine closure plan along with quarry plan for the approval from competent authority State Govt. before the renewal of quarry lease. The quarry operation will be started after the approval of mine plan. So at this stage it is not possible to discuss the economic repercussion of mine and manpower retrenchment.
